

# Running a Project

- For Basic Project

1) Press Play button.

- For Runnable Project ( Django Project )

1) Open Terminal. Move to app Directory

```
JD-Retina-2:~ jd$ cd djangoProj/  
JD-Retina-2:djangoProj jd$ ls  
djangoProj      manage.py  
JD-Retina-2:djangoProj jd$
```

2) Run local server

```
JD-Retina-2:djangoProj jd$ ./manage.py runserver 8000  
Validating models...  
  
0 errors found  
July 05, 2014 - 06:10:16  
Django version 1.6.2, using settings 'djangoProj.settings'  
Starting development server at http://127.0.0.1:8000/  
Quit the server with CONTROL-C.  
█
```

3) Change type ( Django ). And press Play Button

4) If you want to change port, go to preference > django
